PROFESSIONAL SUMMARY

Full Stack Software Engineer and Computer Science sophomore at The University of Texas at Dallas with production experience building RESTful APIs, automated data pipelines, and ML-powered applications. Track record of shipping scalable software across fintech and client-facing products, with wins at national and international competitions.

EDUCATION

The University of Texas at Dallas

Bachelor of Science in Computer Science, Minor in Marketing and Entrepreneurship. Comet Robotics Programmer, 26th Place at The International VEXU Robotics Competition; 1st Place National Winner, Technology Student Association Website Development.

Richardson, TX
May 2029

EXPERIENCE

Junior Full Stack Developer Intern

VisorFin Tech Services (VFIN)

Jun. 2025 – Feb. 2026
Gurugram, Delhi NCR

- Architected approximately 10 RESTful APIs using Node.js and Python to securely process user tax information and investment transaction data, supporting 500+ accounts and 9,000+ transactions following a 3-4 month fintech startup launch.
- Automated 6,000+ mutual fund data entries to update daily via cloud hosting with Python and PostgreSQL, eliminating 20+ hours of manual data entry per week and reducing human error by 100%.
- Integrated 12 systematic investment plan calculators into Kotlin Android and Swift iOS apps, consistently delivering features 1 day ahead of schedule.

Tutor

Schoolhouse and Learn To Be

2023 – 2024

- Developed and taught curriculum for SAT Math, VEX Robotics, and Computer Science, resulting in an average student score increase of 50 points and a 90% student retention rate across sessions.

PROJECTS

NexDrop <https://github.com/nshah2006/NexDrop>

- Won the Major League Hacking Award at HackSMU for an AI-driven pipeline and data analysis project.
- Built computer vision pipelines using OpenCV and TensorFlow with Scikit-learn to develop machine learning geographic information systems, applying them to raw satellite images to extract building roof areas via matrix operations.
- Created automated CI/CD pipelines integrating precipitation history and roof surface area data to calculate ROI and investment viability scores, streamlining lead generation for water-harvesting firms.

Navix Designs

Sep. 2023 – May 2025

- Delivered custom website solutions using React, TypeScript, and Tailwind for responsive UIs, with Express.js and PostgreSQL for backend development.
- Analyzed and redesigned 6 client websites using Google Analytics, Supabase, and Next.js, resulting in a 30-40% increase in website traffic and sales within 2-3 months.

CERTIFICATIONS

- CS50x, Harvard University
- Python Certified, CodeHS

SKILLS

Languages: Python, JavaScript, TypeScript, Kotlin, Swift

Frameworks and Libraries: React, Node.js, Next.js, Express.js, Tailwind, TensorFlow, OpenCV, Scikit-learn

Databases and Cloud: PostgreSQL, AWS, Google Cloud Platform, Firebase, Supabase

Tools: Git, Docker
